

**WBOOTH** SCHOOL OF ENGINEERING PRACTICE AND TECHNOLOGY

McMaster-Mohawk Bachelor of Technology Partnership

June 1, 2020

To whom it may concern:

**Reference Letter for Mr. Jessie Boudreau**

It gives me great pleasure to provide this letter of reference in support of the application of Jessie Boudreau for a position with your company. Over the past few years, Jessie has successfully completed all the power systems engineering courses including Power Distribution, Power Generation, Renewable Energy, Power Protection and Power Quality. In Winter 2020, Jessie and his partner successfully finished their Capstone project entitled “MAC Formula Electric Accumulator”.

Jessie is a hard-working student and a good team player. He has developed a great interest in electrical engineering technology. Moreover, Jessie has good problem solving and communications skills, and is continuously looking for ways to upgrade himself.

I truly believe that Jessie will make valuable contributions to your company, once given an opportunity.

Regards,

Chi Tang, Ph.D., P.Eng.  
Assistant Professor and Program Chair  
Power & Energy Engineering Technology  
Bachelor of Technology Program  
W Booth of Engineering Practice and Technology  
Faculty of Engineering | McMaster University
